

Reduce Your Footprint – without changing your life...

The Conservepump™ Home Smartbox

- Use bathing and showering water to flush toilets; one size fits all; new construction or retro-fit.
- Reduces water consumption by 30% and more; bathing water heat stays in house – not down the drain!
- Automated system controls and fail-safe measures; easy to live with
- Simple home-owner maintenance is all that's needed
- Smart interface lets you know what's happening
- Smartbox automatically adds make-up water, also purges storage tank on 48 hour interval when tank is low
- Allows complete disconnection of toilets from drinking water system; eliminates cross connection hazard
- Put mandated 'purple' pipes to use right now
- Works during power outages
- Install in garage or utility space; washing machine sized
- Average system price \$2000
Smartbox price \$969
