

Reduce Your Footprint – without changing your life...
The Conservepump™ Hose-end provides the world's best high-efficiency garden irrigation- you conserve water and protect your plants at the same time.

The soil moisture sensor is the key to the system's smart operation

Automatic watering, only when you need it (or when you're away!)

Do you want your garden to be watered properly when you're there or while you go away on holidays without wasting water?

The Hose-end is the most sophisticated homeowner-installed watering device available on the market today. Its state of the art controller monitors the garden soil's moisture and waters only when it's needed!

Conservepump™ Hose-end

\$599 + GST

Wall-mount box contains: controller, daylight sensor, battery, charger, and automatic water valve c/w hose connections. Solar power option, add \$150.
